

Introducing

Refresh™

AIR FLOW SYSTEM

Increase your comfort and productivity with CPA's Refresh™ air flow system.

Full Kit	part # RF-KIT
Rechargeable battery	part # RF-BATT
Bag of 3 filters	part # FR-FLTR

CPA's waist belt unit minimizes stagnant air in your hood by delivering a steady stream of ambient air flow.

The Refresh™ LED button allows you to select variable air speeds while its helmet diffuser provides directional control of air flow over the face and head. Cooler air provides comfort and decreases the chance of lens fogging. The unique swivel hose connection increases maneuverability. The rechargeable battery provides up to 5 hours of battery life.

- ◆ Our Refresh™ system can be used with any CPA Arc hood as well as with any of our HRC2 face shields.
- ◆ Refresh™ fans are not NIOSH approved and do not provide breathable air filtration. They are a means to provide ambient air flow only.
- ◆ Refresh™ full kit includes: Fan belt unit with FR cover, hose with FR cover, hard cap with diffuser, rechargeable battery, AC power adapter and two filters.
