from SAFEGUARD AMERICA, LLC  
The original blue leather glove

IN CASE OF FIRE  
BREAK GLASS

# FireGuard® Commander

**DIRECT GRIP®**  
GLOVE INSERTS

Our most popular FireGuard® glove to date. The Commander® was the first glove style on the market to incorporate CROSSTECH® DIRECT GRIP® glove inserts and is the best selling CROSSTECH® DIRECT GRIP® glove style in the world.

**FEATURES:** Outer glove is 100% DuraSoft® cowhide. Dexterity improves with each use. Two layer glove allows better "feel". Our longest lasting glove means you spend less money on gloves over time.

**COMFORT:** Truer fit allows you to complete tasks without having to remove your gloves.

The DuraSoft® leather shell absorbs 50% less water than other leather, reducing weight on hands to help lessen firefighter fatigue. Thus these gloves dry faster than those made with untreated leather.

The CROSSTECH® DIRECT GRIP® glove inserts provide penetration resistant against blood, body fluids, and NFPA common chemicals, as well as superior performances unmatched by any other waterproof, breathable barrier product. The CROSSTECH® DIRECT GRIP® glove insert combines the moisture barrier element and the thermal liner into one unit for a more flexible, streamlined insert.

**SAFETY:** The CROSSTECH® DIRECT GRIP® glove inserts maintain their integrity after repeated exposure to radiant and conductive heat. They remained waterproof after exposure to 500° F for five minutes. Two widely used competitive products failed after this exposure.

CROSSTECH® DIRECT GRIP® Glove inserts provide superior abrasion resistance. They remain waterproof after 10,000 cycles of liner against shell—five times better than competitive polyurethane-based breathable product. (Universal Wear Test Method, FTM 191A-5302.)

## CERTIFICATION

The FireGuard® Commander meets the glove requirements of NFPA 1971 standard on protective ensemble for structural fire fighting current edition and/or Federal OSHA 29 CFR 1910.156 (e)(4) effective 7-1-85 & California OSHA title 8, GISO section 3407, effective 5-4-85. CE certified.

# FireGuard® Patriot

**DIRECT GRIP®**  
GLOVE INSERTS

The gold color Patriot® glove is our most economical glove featuring CROSSTECH® glove inserts and long-lasting comfortable fleece lining. This 3 layer glove provides outstanding fit. Available in our seven (7) true-fit sizes.

**COMFORT:** Newly tailored patterns maximize fingertip contact and control. Truer fit allows you to complete tasks without having to remove your gloves.

Inner layer of flame resistant knitted fabric insulates hands from heat and cold.

**SAFETY:** The CROSSTECH® glove insert provides penetration resistance against blood, body fluids, and NFPA common chemicals, as well as superior performance to any other waterproof, breathable barrier product. Gore's "intimate" bicomponent membrane technology is unmatched for durable liquid penetration resistance and high moisture vapor breathability.

Our premium, slightly heavier leather offers maximum protection from heat and abrasion as well as enhanced dexterity.

Gloves are lock stitched with Kevlar® thread.

Style # 80027G

## CERTIFICATION

The FireGuard® Patriot meets the glove requirements of NFPA 1971 standard on protective ensemble for structural fire fighting current edition and/or Federal OSHA 29 CFR 1910.156 (e)(4) effective 7-1-85 & California OSHA title 8, GISO section 3407, effective 5-4-85. CE certified.

# FireGuard® Elk Bak

Style # 95027

*Pliable elk leather on the back combines with durable side split cowhide on the palm for improved dexterity as well as safety.*

**COMFORT:** Our tailored patterns allow better fingertip contact and control. With this enhanced dexterity from the elk leather you can complete your tasks with less hand fatigue.

The softness of Elk combined with our proprietary DuraSoft® leather palms provide unmatched pliability which helps lessen firefighter fatigue.

The CROSSTECH® DIRECT GRIP® glove inserts provide penetration resistant against blood, body fluids, and NFPA common chemicals, as well as superior performances unmatched by any other waterproof, breathable barrier product. The CROSSTECH® DIRECT GRIP® glove insert combines the moisture barrier element and the thermal liner into one unit for a more flexible, streamlined insert.

**SAFETY:** Our safety goals have the firefighter in mind and require us to EXCEED NFPA Standards. Our CROSSTECH® DIRECT GRIP® Glove inserts offer the highest level of thermal stability. They remained waterproof after exposure to 500° F for five minutes. Two widely used competitive products failed after this exposure.

CROSSTECH® DIRECT GRIP® Glove inserts provide superior abrasion resistance. They remain waterproof after 10,000 cycles of liner against shell—five times better than competitive polyurethane-based breathable product. (Universal Wear Test Method, FTM 191A-5302)

# FireGuard® Spirit

Style # 80024

The FireGuard® Spirit exceeds all California and Federal OSHA requirements. The Spirit is a thermal tanned leather glove with Nomex® wristlets that has two layers of protection, leather and a flame resistant full sack knitted liner. Newly tailored patterns maximize fingertip contact and control. Truer fit allows you to complete tasks without having to remove your gloves. Based on OSHA requirements there are no glove inserts or moisture barriers in our OSHA standard gloves.

Sizes: XS - 3XL

Style # 80025

## Safety, Fire, & Extrication Blanket

Extrication Blanket- Guards against sparks and minor metal splash created during cutting or torching.

Fire Blanket- Will not support flame in air. Helps to smother flames or fire.

Safety Blanket- Warm and comfortable to wrap around and protect from the elements. 60" x 80" Blanket made of the revolutionary CarbonX® fabric. Non-flammable, withstanding heats in excess of 2300° F. Incredible Limiting Oxygen Index which is over 50% higher than Nomex® and 33% higher than PBI®.

Style # 6080-CX

# FireGuard® Hoods

## Nomex® Blend

Economy, compliance and comfort in one hood. Meets or exceeds current hood requirements of NFPA 1971, Standard on Protective Ensemble for Structural Firefighting. Outer shell and lining are a blend of Nomex® and Lenzing FR Rayon.
